

Fibo

The image shows a close-up of a wall covered in large, light-colored marble tiles with grey veining. Two modern, glass pendant lights hang from the ceiling. To the right, a dark wood vanity with a white sink and a round mirror is partially visible.

The smart way to transform walls

www.fibo.co.uk

Invented, designed and produced in Norway since 1952

Fibo was the first to make the 'click' system for walls.

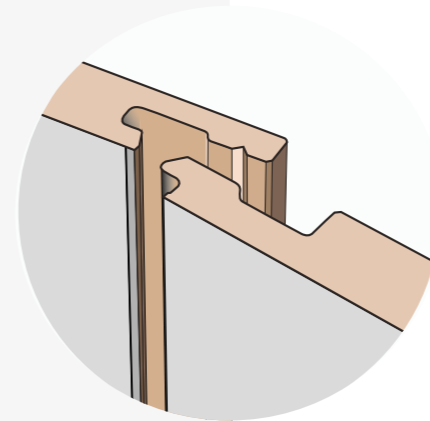

Starting out quite modestly in a small factory in Southern Norway, today we operate a multi-million pound award winning factory producing panels for over 100,000 bathrooms a year.

We are now the leading supplier of plywood waterproof wall panel systems across Europe.

Fibo system in a nutshell

Fibo's wall system is a fully watertight solution that consists of wall panels, profiles and accessories.

The system does not require plaster, vapour barriers or grouting.

Walls

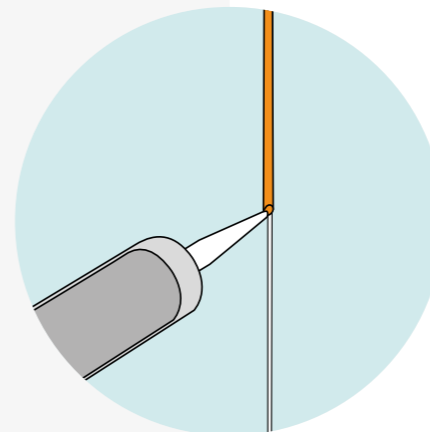

The Fibo panels are made from a high-pressed laminate surface, seven layered plywood core and enhanced moisture barrier. Our 600 mm & 900 mm panels are supplied with our unique Aqualock system and are easy to fit.

The panels can be screwed directly into studs or glued to existing walls. This means you have no need for backing boards or chipboard. The system does not require plaster, vapour barriers or grouting.

Profiles

We have a range of profiles specially adapted to make the system 100% waterproof.

Accessories

Our range of accessories provide everything needed to easily install and maintain the system. Provided that the wall panels are correctly installed, we provide a 25-year warranty on our panels.

Pictured on front cover: Stone collection: Arctic Onyx T4023-M6060

Create the perfect space by selecting your favourite decor or mix and match panels and profiles to create a design that is uniquely yours.

We've carefully selected our favourite combinations to help you create your dream bathroom space. How will you pair yours?

Customising your walls...

Step 1

Choose your design style

Select a design style that you feel most connected with.

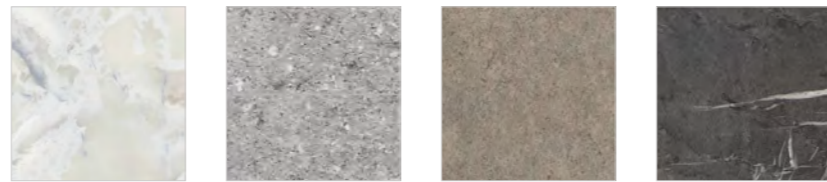

Calm – Scandinavian Tile-Effect Collection

Our Scandinavian collection offers you the warm muted tones of woods and cements that are rooted Scandi design.

Traditional – Stone Collection

Our Stone collection offers you a range of traditional tile and plain options for the classic luxury look.

Modern - Contemporary Tile-Effect Collection

Our Contemporary collection offers you a mix of bright and light colours and whites to revamp your space.

Industrial – Urban Tile-Effect Collection

Our Urban collection offers you a range of tile patterns both traditional and modern in a range of colours, great to create different moods in a space.

Step 2

Map your room

Why not mix and match decors? You don't need a full wall to create a feature. Using a different panel decor to highlight a shower shelf might be all you need. We've pulled together some decors we think go together.

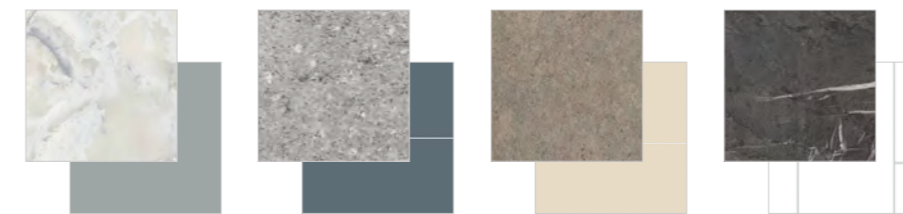

Light Wood Slats & Olive Green

Grey Sahara & Dusky Pink Elongated Hex

Moonstone & Aberdeen Metro Brick

Cracked Cement & Warm Grey

Arctic Onyx & Medium Grey

Polished Stone & Dusty Blue

Rustic Granite & Light Sand

Black Marble & White Straight Herringbone

Dusky Pink & Avalon Pine Vertical Plank

Light Sand & Dark wood

Medium Grey Metro Brick & Grey Stone

Denver White Stacked Subway & Dusty Blue

Black Hexagon & Moonstone

Moonstone Chevron & Pure Oak Vertical Plank

Rough Cement Hexagon & Dark Terrazzo

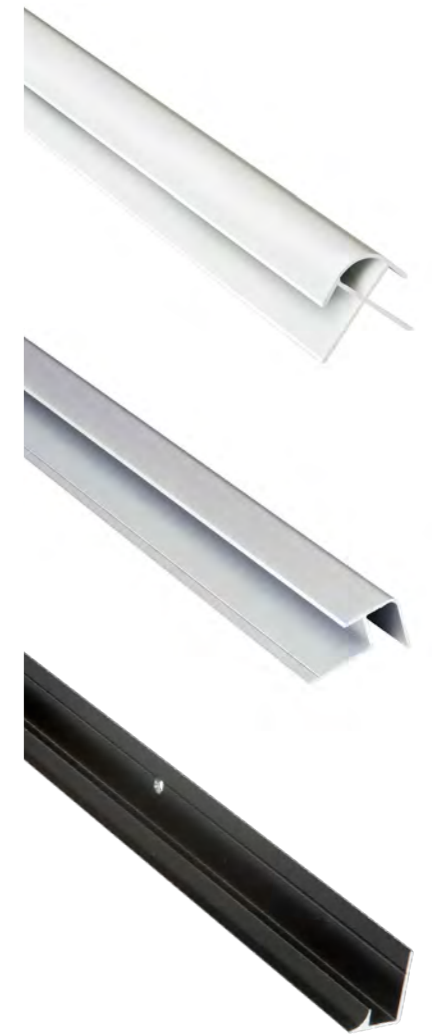

Bottle Green Stacked Subway & Oak Nature

Step 3

Match your metals

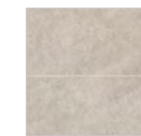

Match your profile and sealant colour to the grout line or your other bathroom fittings.

Or for a bolder look why not try mix and matching your trims?

Norwegian heritage

A trend here to stay, the Scandinavian range reflects our Norwegian heritage with clean lines and smart tile effects.

Whether you prefer a rustic wood effect, a super-modern industrial look or a warm and cozy haven, this collection has something for everyone and can be styled in line with modern bathroom trends.

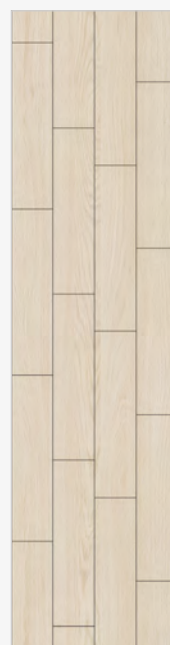

Fibo's tile-effect panels are specially produced with realistic grout lines that make them look and feel just like tiles but without the hassle of grout maintenance. Life is too short for cleaning!

Modern, bold and stylish

Our Urban collection is both modern and stylish. With neat geometric designs such as the Stacked Subway, it is inspired by patterns and shapes found in urban city environments.

The trendy Metro Brick is available with a splash of colour as well as the ever-popular white and grey shades. For a bolder statement in the bathroom, why not choose one of our Hexagonal designs now available in stunning Rough Cement. For a smart way to transform your walls, why not try the classic Herringbone or our modern Chevron designs?

Scan the QR code to visit our website and find out more about the Urban Tile-Effect Collection.

A simple and complete solution

Fibo's wall system is fully watertight and is supplied as a complete solution consisting of wall panels, profiles and accessories.

The system

1. Wall Panels

Composition

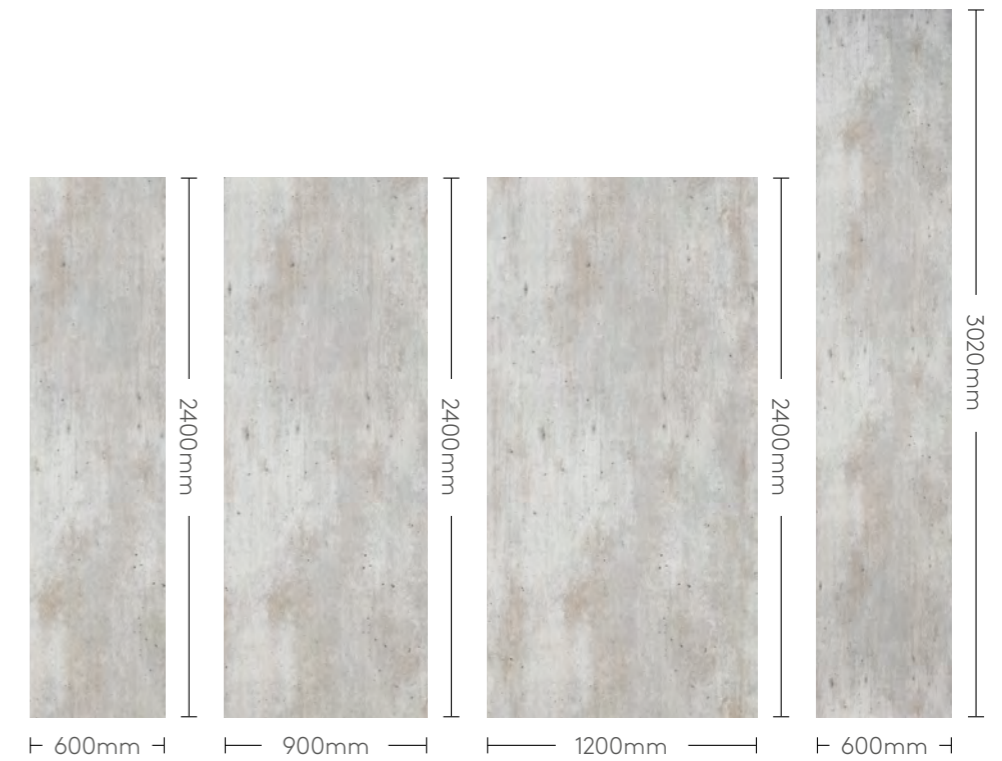

Our panels are made from a PEFC- certified seven-layer birch plywood core, a high-pressed surface, and Aqualock tongue and groove joint which is quick and easy to install, creating a 100% waterproof wall panel system for interior walls.

Designed and manufactured in Norway since 1952, creating instant transformations of walls within hours. The system is approved under stringent SINTEF wet room standards in Scandinavia.

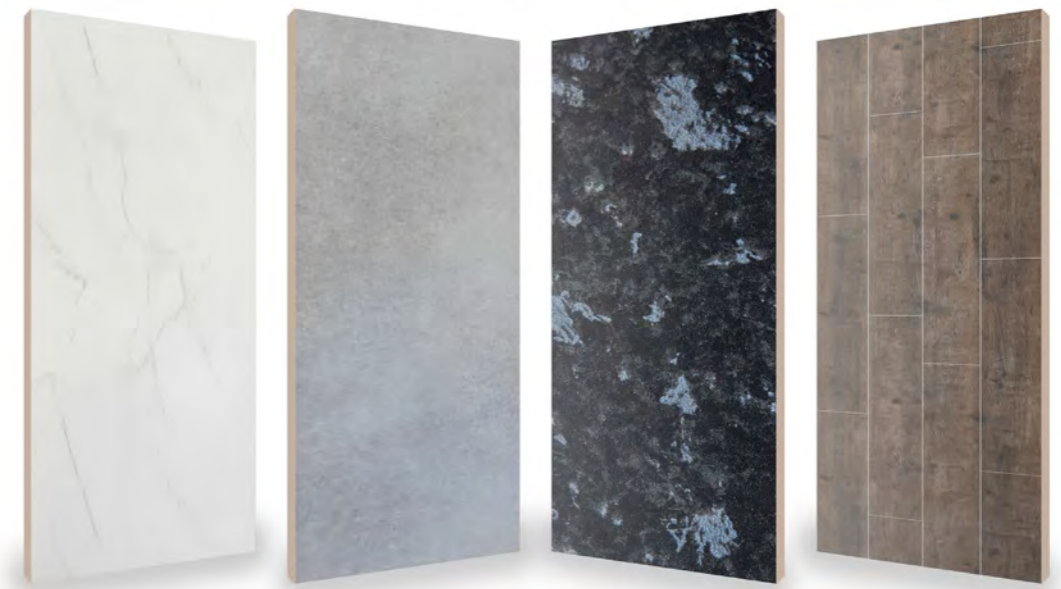

Panel size options

With 2400mm high and 600mm wide wall panels, you can easily cover the wall from floor to ceiling. Some of our panels are also available in 900mm wide with a tongue and groove joint and 1200mm wide in square edge only. As a special order, panels in heights of 3020mm are available for rooms with particularly high ceilings. For more information, please contact the office on 01494 771242 or email sales@fibo.co.uk.

When installing Fibo panels:

- ✓ Can be easily cut and adapted to your walls without the mess
- ✓ Can be screwed directly into wooden or metal stud walls, meaning you have no need for backing boards or chipboard
- ✓ Can be glued onto existing wall surfaces, such as tiles or concrete with Fibo adhesive
- ✓ Dry quickly, making them fast to fit
- ✓ Are durable, as they don't crack during transport, installing or with house movement overtime.

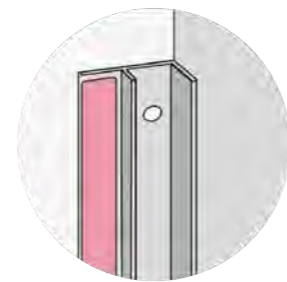

The colour and pattern variation can vary from panel to panel. Please make sure you view laminate samples or visit a showroom to ensure you are happy with your choice of decor before purchase.

Design your bathroom from our range of tile and non-tile decors, and match it up with our selection of profiles.

2. Profiles

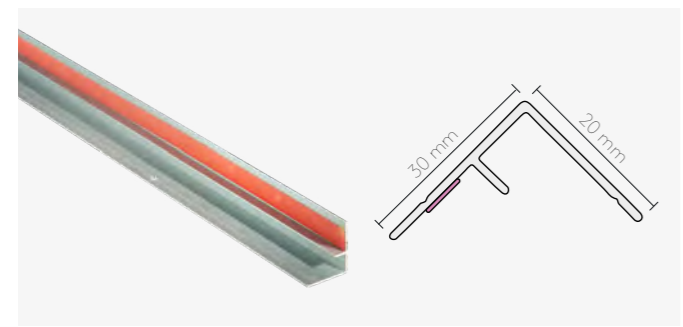

Like our wall panels, profiles also have two purposes. Not only are they there to finish off your beautiful bathroom, our profiles are also specially adapted to make the systems 100% waterproof.

Key

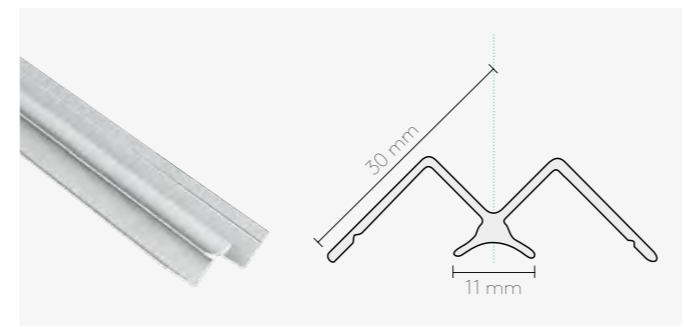

- White PVC
- Aluminium
- Polished Chrome
- Black

135° external corner profile

○ 135-EXT

Base profile

○ RSABP ● RSABP-BL

Stacking profile*

○ WP110-STACK ○ AAHS ● CHR-HS ● AAHS-BL

**There are two different types of stacking profile. White PVC, aluminium and polished chrome come as a one part (H shape) profile. The black stacking profile comes as a two part, as seen in the image above.*

How to best use our profiles

- Use Hidden Internal Corners if you want a seamless room with no metal strips in the corners
- Hide exposed edges with a J or L shape – this really works with half walls
- Use an L shape for windows and boxing in

3. Accessories

Our range of accessories completes our system, by providing every fitter with everything they need to install, seal and finish the wall panel system to ensure it is 100% waterproof.

Fixing

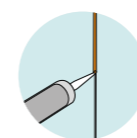

Click Wax: make it easy fixing the panels in place with the Aqualock joint. Use on the back of the male joint only.

Grips: simplify lifting and fixing of panels in place with our Fibo grips.

Sealing tool: This is a superb multi-use tool. Use it to remove excess adhesive from panel joints and corner strips. Also use for smoothing the adhesive in the corners and around the base profile.

Adhesive: designed and tested in rigorous environments, glue panels to back wall substrates.

Tapping tool: use it in conjunction with two piece internal corner profile.

Sealing

Sealant: Specially designed to be used with the Fibo system, our sealant comes in 3 different colours to match your grout lines – black, grey and white.

Sealing tool: Grab that sealing tool again and use it to even out sealant on cut edges and remove excess sealant from panel joints and corner strips.

Cleaning

Wipes: Clean profiles before fixing them in place, using it to remove excess grout during assembly, usually in combination with Fibo Clean.

Cleaning Spray: Use it to remove excess grout during assembly, combined with the Wipes, and cleaning profiles before installation.

Sealing tool: This tool really is useful! Use it to remove or smooth excess sealant.

Magic Sponge: Use it to clean the panels and remove stains, for extra matt surface panels.

Sold in box and single quantities. Please speak to your local stockist for more information or call our sales team on **01494 771242**

Everything You Need to Install Fibo Wall Panels

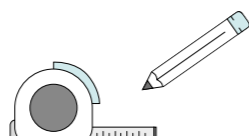

Tools Required for a Flawless Installation of Bathroom and Kitchen Boards

Screwdriver

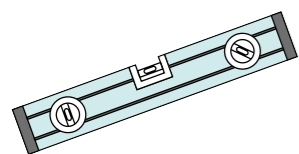

Fine-tooth blade for a circular saw, track saw or jigsaw

Ruler and pencil

Drill and hole saw for making holes in panels

Spirit level

Fibo Sealing Tool

Fibo Clean Spray

Fibo Wipes

Wall Panels in a Wet Room

Estimate that 1 pack (2 panels per pack) cover 2.88 meters² of wall.

Accessories	Amount
Fibo Seal- Sealant	1 tube covers max 2 panels (1 pack)
Fibo Adhesive	1 tube covers roughly 2 panels (1 pack)
Fibo Profiles:	
Base profiles	1 (2400mm) base profile covers 4 panels (2 packs)
Internal corner profiles	1 (2400mm) internal corner profile
External corner profiles	1 (2400mm) external corner profile
L-Shape profiles	Depending on design and potential finishing in the room
J-Shape profiles	Depending on design and potential finishing in the room
Fibo Wipes (35 wipes per pack)	1 tub is sufficient for approximately 16 panels (8 packs)
Fibo Sealing Tool (2x tools per pack)	1 pack
Fibo Tapping Tool	1 piece is needed for a room with 2-part internal corner profiles
Fibo Grip	1 piece
Fibo Clean	1 can is sufficient for approximately 16 panels (8 packs)
Fibo Click Wax	1 piece is sufficient for approximately 16 panels (8 packs)

Denver White Code: T3091-M0830
Tile size: 7.5 x 30 cm

1. Base profile
2. Hidden internal corner profile
3. L shape profile
4. External corner profile
5. Stacking Profile

The benefits of using Fibo

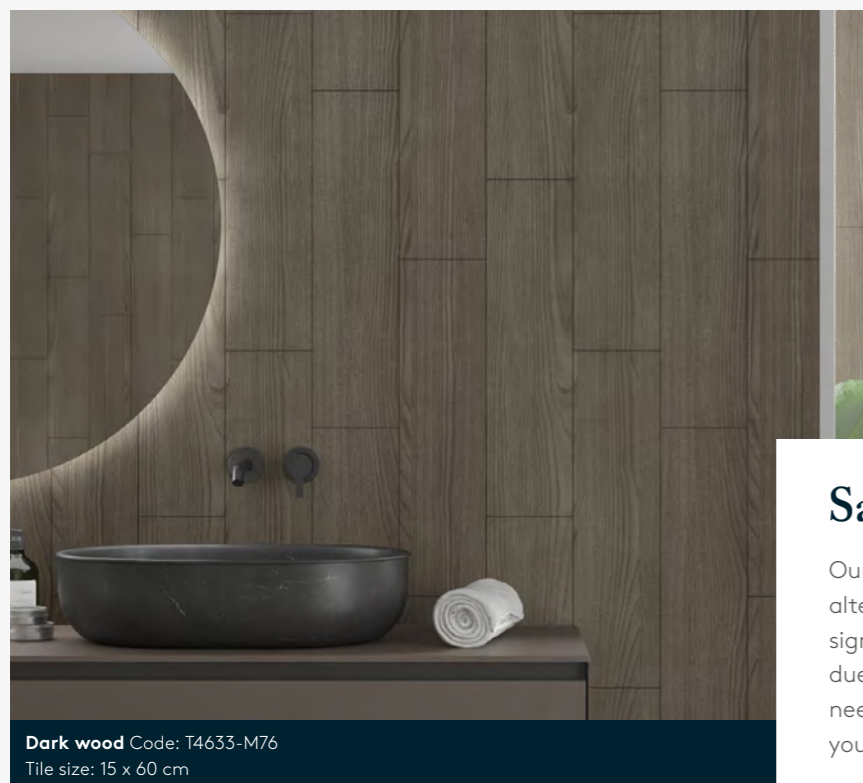

25 years
Manufacturer's
Warranty

Grey Stone Code: T4009-M6060
Tile size: 60 x 60 cm

Look and feel like tiles

If you still want the look, feel and effect of tiles without the hassle and mess of grouting, Fibo is the perfect alternative. Some other wall panel manufacturers simply print the grout line onto the panel. However, we choose to carve out the grout line during the manufacturing process in our state-of-the-art factory.

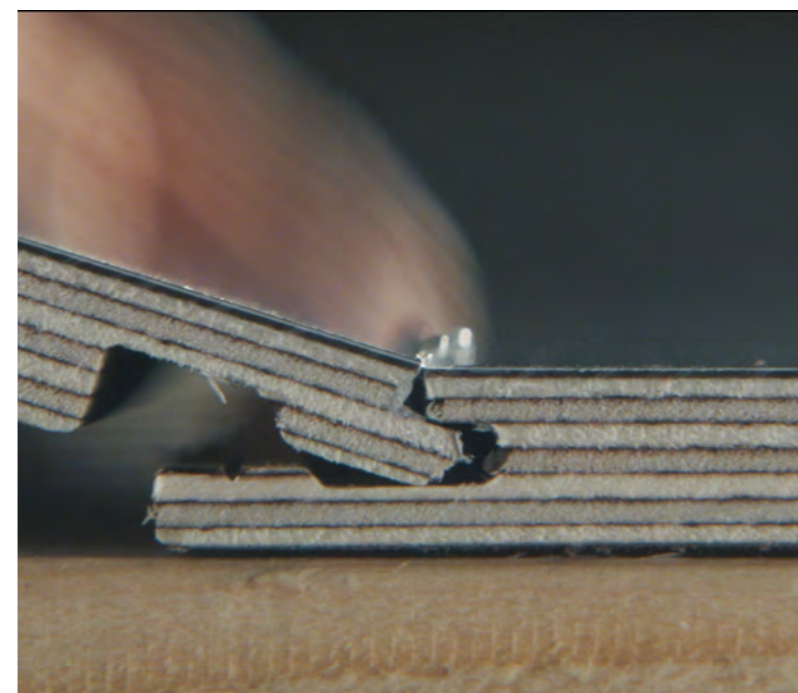

Dark wood Code: T4633-M76
Tile size: 15 x 60 cm

Five times faster than tiles

Fibo wall panels are designed to make installation easy and efficient. The wall system can be mounted up to five times faster than tiles and panels can be attached to a timber frame, existing tiles or plasterboard.

Saves you money

Our wall panels are a more cost-effective alternative to tiles because you can save a significant amount of money on labour costs due to the ease of installation. There is no need to wait for tanking or grout to dry so you can install Fibo in a day!

Precision engineered Aqualock

Our panels are clicked together with the Fibo Aqualock tongue and groove joint which provides virtually invisible join lines. Joining the panels couldn't be easier. Just seal, click and go!

Aberdeen Code: T0089-M6040

100% waterproof

Our Aqualock joint makes Fibo wall systems the perfect choice for both renovations and new builds. Our unique system provides a 100% waterproof surface when used in conjunction with an approved sealant such as Fibo Seal.

Certified antibacterial

All Fibo wall panels now come with antibacterial certification. Our panel surfaces contain no harmful substances, require no special maintenance and are tested according to the ISO 22196 standard. This means that it is virtually impossible (99.99%) for E. coli and Staphylococcus bacteria to survive. The certification covers all our panel decors, both with and without, tile designs.

Tried and tested

Tried and tested in Norway for over 70 years, Fibo was the first to make the 'click' system for walls. Starting out quite modestly in 1952 in a small factory, today we operate a multi-million pound award winning factory producing panels for over 100,000 bathrooms a year. We are now the leading supplier of plywood waterproof wall panel systems across Europe.

Good for you and the environment

We only use PEFC-certified renewable plywood, without harmful chemicals, to produce our panels. Independent research confirms that our panels have a 37% lower carbon footprint than tiles when installed in a typical bathroom. To find out more, visit fibo.co.uk.

Walls built for life

At Fibo we are committed to sustainable development, which drives every decision we make from our raw materials to our manufacturing.

Sustainable sourcing

All our materials are fully traceable, and we publish our Environmental, Social and Governance (ESG) report annually so you can track our progress. Our panels are PEFC-certified renewable plywood, without harmful chemicals, to produce our panels.

Our panels also come with its own EPD (Environmental Product Declaration) which documents the environmental calculation for both raw material and the production.

Impact on the environment

We continuously strive to reduce our environmental impact. We have reduced our energy consumption during manufacturing, halved the amount of plastic used in packaging and reduced wastage in production. Our factory has the highest environmental standard and is certified according to ISO 14001:2015.

Furthermore, an independent research report confirms that our panels have a 37% lower carbon footprint than tiles when installed in a bathroom.
